

What is KeySmart?

KeySmart is a state of the art personal GPS locator that comes packaged with an impressive array of benefits and services. Simply place the KeySmart device in your pocket and with the push of a button the KeySmart Call Center can pinpoint your location and send help.

Why do I need KeySmart?

KeySmart is designed with your family in mind. The KeySmart device can help locate a missing child, assist in an emergency situation and provides professional concierge services anytime and more. Whether it is safety, security or convenience, you can have peace of mind knowing the KeySmart is the most powerful, smallest, and easiest to use device available today for everyone of all ages.

How does KeySmart locate me?

Utilizing both Assisted and Standalone GPS, KeySmart is able to determine your location via a combination of cell triangulation and the greatest number of GPS satellites available.

How do I send an Alert?

KeySmart is equipped with a configurable SOS soft button for user-set alert functions for even more peace of mind. The minute you or your child needs help, simply press the SOS button on the side of the unit.

How long is the battery expected to last between charges?

Your KeySmart battery will last 3 to 5 days (depending on frequency of locating the device). In Standby mode it will last up to 5 days.
